The institute has been accredited by NBA for three years (2018-2021) and NAAC with "A" grade (2018-2023). SKBCOP received 34th (2017), 44th(2018) and 59th (2019) NIRF-ranking by Ministry of Human Resources and Development, Govt. of India and also ranked in platinum category by AICTE-CII for last two years successively.

## About the FDP :

A lot of research work is undertaken in academic institutes, but the use of conventional methodology makes it impractical many times. In addition, very rarely, do we see institute research work being of very high commercial value. Also academic institution must aim to achieve financial profits through their own research. Hence to run and develop R&D culture in academic institutions, every institute has to look after new avenues to raise funds. In such a scenario, this faculty development programme aims to provide a platform for delegates to understand how they can focus their research activities to generate

patents by learning about recent frontiers in patenting and drug design and development.

## Objectives :

- Assessing innovation and non-obviousness in initial steps of drug-discovery protocols.
- Apply outcome based research ideas
- Monetization of research through patents
- Appreciating the differences in scope of drug-discovery outcomes in different patenting systems across world.
- Focusing on self-sustainable research through patents
- Institute benefit exploration in patent oriented drug discovery

## Benefit to the faculty :

- Provide a forum to grab current information on drug design & development in regards to patenting.
- To discuss various ways used for the drug design and development.
- To provide an opportunity for delegates to resolve practical problems by discussion with resource persons from industry and research.
- Delegates will have an opportunity to learn various recent advancement in industry and academics.
- To discuss and debate over some of key issues related with the pharmaceutical field.
